

## MILLIONS INVOLVED.

### The Telephone Again in the Courts.

Permission Given by the Government to Test the Bell "Hello" Patent.

MEMPHIS, TENN., September 11.—A bill has been filed in the United States District Court here which involves larger interests than any ever known before. It is styled the United States versus the American Bell Telephone Company. The bill alleges: 1. That patent 174,645, on which the exclusive right to the "hello" of telephony was granted to Prof. Alexander Graham Bell as the original and first inventor, and which is the foundation of the American Bell Telephone Company to said art, was obtained from the United States by false suggestion and fraud. 2. That the Patent Office Examiner was deceived and imposed upon in securing said letters patent. 3. That important secrets were disclosed to said Bell by a Patent Office official in direct violation of the act of Congress, which said Bell took advantage of in obtaining said exclusive grant. 4. That said Bell was not the original and first inventor, and entitled as such to stand at the head of the "art," that his alleged invention was anticipated by others and well known by the learned and scientific long prior to his alleged discovery. 5. That he knew that he was not the original and first inventor. 6. That he, nevertheless, falsely made oath that he was such, and original inventor, and by suppressing the truth, by false suggestion and contrivance, he procured said letters patent. 7. That said Bell's description of his alleged invention is fatally defective, and the alleged invention itself, without other discoveries and invention on the art, is wholly valueless. 8. That as early as 1862 the electric speaking telephone was known and publicly used by Philip Reis, the true inventor, who made various improvements in the art between that date and his death, which occurred in 1874, and that he successfully put his invention to the test by actually transmitting and delivering articulate speech; that said Bell not only invented the art but named the machine for its use—"the telephone." 9. That others made improvements on the art, and successfully employed it after his discovery and prior to the alleged invention of said Bell; that said Bell well knew the existence of the art and the state of the improvements thereon at the time of his alleged invention, and obtained his patent by concealing the fact and imposing on the Patent Office. 10. That if he fully and truthfully disclosed what he knew on the subject he could not have obtained said patent. 11. The broad art belongs to the public because anticipated by others, and the monopoly claimed and enjoyed by the American Bell Telephone Company by reason of the said patent is unjust, wrong and oppressive to many inventors on that art, whose discoveries are covered by letters patent from the Government as well as to the people at large of the United States. 12. That a grant so obtained should be recalled, repealed and vacated, and accordingly the bill prays that the said patent be recalled and vacated, and that the Government as well as the people at large of the United States be made to the Department of Justice for leave to file the bill to repeal and recall the said grant, and upon proper showing the leave was granted and the bill is filed upon permission to obtain. The bill is long and elaborate, and the strongest was made to the Hon. H. W. McCorty, the District Attorney, that he felt it his duty to lay the matter before the Department of Justice and ask permission to file a bill in the name of the United States, raising the direct question as to the validity of said patent. The bill is a very important one. The Bell grant or patent, as constructed by the courts, secures to the American Bell Telephone Company a monopoly worth millions per annum, as it is understood. The struggle promises to become of great interest. It is a new turn in course of the conflicting claims as to the originality of discovery touching the telephone. The Hon. H. W. McCorty will be assisted by Gantt & Patterson, Wright & Fowles, Morgan & McFarland, Taylor & Carroll, and the Hon. Casey Young, of Memphis, and J. H. Beckwith, of New Orleans, who have been specially appointed by the Government for that purpose.

### Suicide of a Count.

MONTREAL, September 11.—This afternoon the Count H. Wilhelm Browne, of Berlin, who arrived by steamer this morning from New South Wales, shot himself in front of St. Lawrence Hall, on St. James street. The particulars are as follows: The Count, who owned a large estate in Germany, left home early last spring to visit Australia and South America, leaving a young and beautiful wife behind him. At Rio Janeiro he received a cablegram that his wife had fled with a young tradesman, and was supposed to be in either New South Wales or in Canada. He at once left for the former place, and failing there, he sought the guilty couple, came here, where he found his wife and her paramour living at one of the hotels. He visited her and entreated her to return, but without avail. He then went to St. Lawrence Hall and had dinner, after which he walked coolly out on the sidewalk and discharged his revolver at his left ear, the bullet going through the ear. He was conveyed to Notre Dame Hospital, where he lies in a dying condition.

### Aping the United States Stamps.

St. Louis, Mo., September 11.—L. W. Bouch & Co., dealers in old stamps and coins, to-day turned over to the United States officers a lot of newspaper and magazine stamps manufactured in Leipzig, Germany. They are in imitation of United States stamps, and are of twenty-three different denominations, ranging from two cents to \$60. The word facsimile is printed over the face of each, but so faintly that the letters are with difficulty made out, and the District Attorney says that they must be classed as counterfeit. They were sent here by the Leipzig dealer as samples, and are a perfect imitation of the genuine.

### A Cowardly Crew.

GENOA, September 11.—The steamer Villa De Malaga, with sixty passengers and a crew of twenty-eight, had foundered near Savona. A panic seized among the passengers, and the crew availed themselves of the confusion to lower boats and escape. Forty-four passengers, however, managed to save themselves, the remaining sixteen being drowned. The cowardly action of the crew has aroused much indignation.

### Death from Hydrochloric Acid.

NEW YORK, September 10.—Moses Froehlich, thirty-seven years old, of 695 Second Avenue, walked into a police station early this morning and told the Sergeant that he had drunk a small quantity of hydrochloric acid from a cup which he supposed contained water, while at his factory in Canal street. Froehlich died soon after his removal to the hospital.

### Prominent Merchant Murdered.

St. Louis, September 11.—Jacob Keeler, a leading merchant of Rock Bridge, Ill., was found dead in his store this morning, with two bullet holes in his body. All the circumstances in the case point to murder, but no clue has been obtained to the perpetrator of the deed.

## LAKE STORMS.

### Great Loss of Property Reported and a Number of Lives Forfeited.

MILWAUKEE, Wis., September 10.—News received from all directions show that the late storm was one of the most severe that has prevailed on Lake Michigan in many years. Until more complete advices are received, it will be impossible to state the actual number of lives lost or the amount of damage to property. The following is a list of those lost on the schooner Advance, near Sheboygan; Captain M. Paulson and his son George, Martin Pierson, Henry Holt and Thos. Ingerberston. Jacob Baum, the sole survivor of the schooner's crew, states that the crew endeavored to prevail upon Captain Paulson to beach the Advance on a life, but he refused and dropped anchor in the midst of the storm, hoping to save the vessel and cargo. The sea broke over the vessel and she filled and capsized. The crew attempted to make land, but with the exception of Baum all were drowned in the breakers. An unknown schooner, supposed to be the Milton, of this port, is reported driven ashore north of Two Rivers. Nothing has been seen or heard of the crew, and it is believed all hands are lost. All safe harbors on the west shore of Lake Michigan are filled with vessels which have gone in to seek shelter. Vessels are reported ashore at various points, but the extent of damage and loss of life can not yet be learned. The propellers Empire State and Roanoke are badly stove at Sand Beach. The breakwater at the latter place is damaged to the extent of \$40,000. The schooner George Sherman, loaded with coal, ran on Simpson's Reef and pounded so hard that she broke into; crew were all saved. Unknown vessels are reported ashore near Escanaba. Captain Paulson, of the Advance, was forty-five years old, and leaves a wife and six children. His son was twenty-one years old.

### Scales Lynched.

FRANKLIN, Ky., September 11.—A five-year-old girl at Walton, Ky., Sunday, has been hung to a walnut tree about half-way between Burlington and Florence. After he was hung the mob riddled his body with bullets. His lifeless remains now hang dangling in the air, and the mob is shooting and hallooing. At Burlington the mob experienced great difficulty in getting in the jail. The great iron doors were broken in with hard blows. After Scales was found the mob rushed on to him, bound him hand and foot. In hurrying him down the steps of the jail the negro fell to the bottom, cutting a horrible gash in his forehead. He was grabbed by some of the mob and made to run down to where a spring wagon was held in waiting. Scales was frightened almost to death. He prayed and begged for mercy. "I am innocent," said he; "old man Lunsford has done put that on me because I would not steal him chickens." "That's all right," said one of the mob. "We will fix you so you won't steal any more chickens." Scales grew very nervous and said: "My name is Scales, gentlemen, and you can do with me what you like, but give me a chance to explain. I can prove that I am innocent." He was hustled into a spring wagon and drove about five miles down the pike, when he was hung. After the mob got their prisoner they were pursued by the Sheriff and posse, and a hot fight ensued. Several of the mob were taken prisoners.

### Very Essential Missionary Utensils Lost.

WASHINGTON, September 10.—The Allan Line Steamship Hanoverian, recently wrecked near St. John's N.F., on the voyage from Baltimore to Liverpool, had on board three cases and three barrels of goods shipped at this city for the Lutheran Mission Station at Guntur, in India. They were to be transferred at Liverpool to a vessel for Madras, and were to go thence to Guntur. The cases and barrels were packed with dolls, nearly six hundred bottles of perfume, fancy soaps, picture books, etc., sent in response to the request for articles of this kind to be given as prizes to the girls in the mission schools. The articles came as gifts from many places in the United States, including missionary societies connected with church congregations in Baltimore and other parts of Maryland, Washington, Chicago, Pennsylvania, Virginia, Georgia, Kentucky, Ohio, New York and States in the West. It is stated that all the packages were lost with the wreck, and the Indian girls will be short of Christmas presents, unless another shipment should be made.

### Naphtha Fumes Cause an Episode.

BOSTON, Mass., September 11.—There was a startling scene at the American Rubber Works, in Cambridge, to-day. One of the girls suddenly began to laugh loudly and act strangely, and then fainted. Several others also dropped on the floor, and before physicians could be summoned more than thirty employees were unconscious or in hysterics. It appeared that naphtha fumes had affected them, much the same as laughing gas would, and they took the home in carriages. An unusual quantity of naphtha was used to-day. The girls will probably be well enough to work to-morrow.

### Naval Officer Commits Suicide.

NEW ORLEANS, September 10.—This afternoon Assistant Engineer Frederick C. Rider, of the U. S. man-of-war Swatara, committed suicide by shooting. The bullet entered his head and death ensued instantly. No cause can be assigned for the act. Just before the fatal shot was fired Rider entered the ship from a visit to the city, and went to his late-room apartment in excellent humor. He was twenty-four years old, a native of Providence, R. I., and a graduate of the Naval Academy of Annapolis of the class of 1880.

### One Way of Driving Out Tramps.

MUNICH, Ind., September 10.—This town has followed the example set by the neighboring town of Anderson with regard to tramps. Yesterday six tramps were released from jail and made to run the gauntlet of nearly two hundred men and boys, armed with whips and clubs, formed in line. The tramps fled down the line and ran into the river, which was not very deep. All emerged safely on the other side, and soon disappeared down the railroad.

### Death of Admiral Livingston.

NEW YORK, September 10.—Rear Admiral John W. Livingston died to-day in his city from heart trouble and old age. He was born in this city in 1804, and entered the navy as a midshipman in 1823. He was subsequently in charge of the navy-yards at Cairo and Norfolk, and was retired in 1874. At the time of his death he was the fourth oldest officer on the list. In 1874 he married Miss Livingston, a cousin, who survives him.

### Tonnage Dues Suspended.

WASHINGTON, September 10.—The President to-day issued a proclamation suspending the collection of tonnage dues on all vessels arriving in any port of the United States from any port of Boca Del Toro, United States of Columbia. This action is taken because no tax or tonnage due is imposed in this port by the Colombian Government on United States vessels.

### Post-Office Robbed of \$2,000.

MARYSVILLE, Kas., September 11.—Burglars last night entered the Post-office, forced open the safe, and secured Government funds and stamps to the amount of \$2,000.

## A BRIDAL OF DEATH.

### A Young Bridegroom Mortally Wounds the Bride's Father and Brother, and is Himself Killed.

ATLANTA, GA., September 9.—A terrible tragedy, in which three men were mortally wounded, occurred here after dark to-night. The parties were John and Mathew Maxwell, father and son, and John R. Shelton, who had eloped with and married Miss Ida Maxwell. Mr. John Maxwell is a highly respectable citizen, living at No. 1 Elliott street. His son Mathew is a well-known manufacturer. Mr. Maxwell has three comely daughters, aged fifteen, sixteen and nineteen. The second, aged sixteen, Miss Ida, has been quite a belle, having a host of admirers. Among them was one John R. Shelton, a young man of good family, but careless habits, whose visits were forbidden by the girl's father. Nevertheless they contrived to meet secretly and pledged their love. At two o'clock this afternoon a gentleman approached Mr. Mathew Maxwell and told him that his sister and Shelton had planned an elopement, and that the appointed time was half-past two o'clock. Hurrying home young Maxwell rushed up to the second-story room which his sister occupied, and found her there. He told her that he had reached her elopement, and she replied, "I will marry you, if I have to die in the attempt. It is useless for you to try and prevent it." In vain the brother expostulated. The girl remained obstinate. He then went out, locked the door and left a prisoner, and went to his room. Returning in ten minutes, he opened the door and found the room empty. It soon developed that the girl, finding herself deserted, opened the window, jumped to the roof below, fifteen feet, and thence to the ground below, another fifteen feet; thence her tracks were followed to the side alley, where new-made carriage tracks told that she had reached her elopement and was away. By this time the elder Maxwell was upon the scene. The two men were fearfully agitated. They went into the house, and at six o'clock, armed to the teeth, emerged and looked for Davis street, whither Shelton had taken his bride, after having been married by Rev. Virgil Norcross. Several clergymen had previously refused to perform the ceremony. Two curious men went up to Shelton's door. Shelton was standing on the threshold with a hatchet. With oath the elder Maxwell exclaimed, "I will shoot you to death unless you give up my daughter." "I do not come here to elope," shouted Shelton, raising the hatchet and advancing. Just then the younger Maxwell, seeing his father's danger, stepped in between and received the cleave from the tomahawk. Dropping the bloody instrument, Shelton then drew his pistol and fired at the elder Maxwell. Simultaneously Maxwell also fired, and all three men fell across the other, wounded and bleeding. The girl who had been the cause of all this bloody work rushed out upon the scene and embraced her dying husband, calling him by endearing names, while her father and brother lay neglected. In five minutes hundreds of people had collected, and officers came and had the men removed. Shelton and young Maxwell will certainly die, while the death of the old man is highly probable. Just a month ago Mathew Maxwell was himself the hero of an important scene, when he was engaged to another, with the day set, eloped with him the night before. The excitement is intense.

### A Fighting Parson.

NASHVILLE, TENN., September 9.—A few days ago, as Rev. W. T. Locke, a Methodist minister stationed in Fayette County, was driving in his buggy, to fill an appointment, he was met in the road by two ruffians who stopped him and insisted that he should alight and play cards with them. He remonstrated, telling them that it was out of his line of business, and he didn't know how. Nothing would satisfy them and they ordered him out only to get out and play, but to let his money. Being forced to get out, he did so, but watched the chance, and when he saw a safe opportunity, he drew a revolver and fired at the two ruffians. One of the would-be robbers died, and with another stroke sent his confederate tottering and severely bruised, into the brush. The person then quietly got into his buggy and drove off. The man supposed to be dead rallied, however, and is now out of danger.

### A Young Man's Fearful Fall.

LEBANON, Pa., September 9.—A week ago Henry Klick and his wife and their nineteen-year-old son, Clayton, went to Narrows Valley in search of herbs. While there the boy disappeared, and after a long search the parents were obliged to return without him. For five days the father has been searching the region for the lost boy. Night before last, as he was about to give up the hunt, he heard a groan which seemed to come from a deep hole in the side of the mountain. Leaping down he shouted and received a faint reply. He quickly went for help, and by the aid of a rope the young man was drawn up to the surface. His legs were broken, and he was nearly dead, having been without food for nearly a week. He had fallen into an abandoned coal-shaft one hundred feet deep. It is feared that his legs must be amputated.

### Prohibition Gubernatorial Nominee.

WORCESTER, MASS., September 10.—The Prohibition State Convention nominated by acclamation Thomas J. Latrop, of Taunton, for Governor. Charles B. Knight, of Worcester, was unanimously nominated for Lieutenant Governor. The balance of the State ticket was made up as follows: Secretary, George H. Knapton; Treasurer, Sharron; Attorney General, Samuel M. Fairfield; Auditor, William Sherman Lowell.

### A Devilish Deed.

GREEN BAY, WIS., September 10.—John B. Owen, conductor on the Northwestern Railroad, walking homeward last evening, after leaving his train, stepped aside to allow a man to pass. Instantly a cup of vitrol was dashed into Owen's face, destroying the sight of his right eye, and otherwise burning him horribly. A stranger giving the name of Walter L. Patterson, Louisville, Ky., has been arrested on suspicion. The motive for the deed is a mystery.

### Distilled Spirits.

WASHINGTON, September 10.—The Commissioner of Internal Revenue reports that the amount of distilled spirits gone into consumption in the United States during the fiscal year ending June 30, 1885, is 68,126,002 gallons, and the amount of malt liquors on which tax was paid during the same period is 19,183,253 barrels. The amount of wine consumed in the country during the year 1884 is estimated at 50,608,340 gallons.

### Cholera Still Decreasing.

PARIS, September 9.—Cholera shows a steady decrease. There were reported in Spain Tuesday 1,735 new cases and 900 deaths. Yesterday there were 1,500 new cases and 572 deaths. Marseilles reported eight, and Toulon three deaths yesterday.

## SIBERIA.

### Family Life in the Russian Convict Settlement.

My village-chief was silent, and shook his head doubtfully. The fact was, the nearest village was ten miles away. The man was satisfied with himself and his crops, and satisfied with his taxes, and over-population was apparently the only thing which he and his peers conceived needed to be set right. On this point we should remember that not nearly all the land is yet taken up, and that many of the farms are as large as, and sometimes larger than, the most extensive American farmer would be satisfied with such an area. In the midst of these extensive estates, stands the spacious log-house, surrounded with barns and sheds, which, possibly, are not large enough. Hardly anything is large enough for the Siberian. I have made personal confirmation of this greed for extension and space in the towns, where it is often carried to excess; thus I have seen parlors where the mirrors and sofas could be counted by the dozen. In bright contrast with the stereotyped complaints of the farmers concerning the too thick population is the fact that they are all proud of having a numerous progeny. The farmer loves his land, his cattle, his summer and fall, but he loves above everything a large family, while, notwithstanding his prejudice against strangers, he lives in the perfect conviction that the country needs men, and he governs his conduct accordingly. In every other country in the world there are founding-hospitals; in Russia they are numerous, but in Siberia there are none. If a mother is not able to take care of her child, she will offer it to the nearest farmer, and he will be glad to have such an increase in his family as if it were a fine cat foisted to him.—Dr. Alfred Rehm, in Popular Science Monthly.

S. B. Barger, of Brownsville, Ore., has on exhibition at the post-office of that city a curiosity in the shape of a natural bow that has elicited the examination of the people in that vicinity. It is a vine maple about eight feet in length, has the curves of an ordinary Indian bow, and, strange to say, is already strung with a slender limb that grows out of one end into the other so perfectly that at first sight it would be quite difficult for one to detect at which end the limb began. The bow is about three inches thick and the string part is about one-fifth of that thickness, and is strong enough to shoot an arrow 200 yards.—San Francisco Examiner.

A tall story comes from New Bedford, Mass., to the effect that the other evening while a young countryman was eating supper at a restaurant he missed his watch, valued at fifty dollars. Before notifying the police he thought best to search his team which had been left on the street. The young man was about giving up the search, when the horse lifted his foot and disclosed the timepiece imbedded in the hollow of the shoe. When removed it was found to have sustained not the slightest injury.—Chicago Times.

Andrew Jack, of No. 256 Little Richmond street, returned home Friday night slightly under the influence of liquor and went to bed without removing his clothes. Saturday morning he was found dead. Blood was oozing from his mouth and nostrils, and it is supposed that he was strangled by a high collar which he wore. It pressed tightly against the arteries of the neck and stopped the circulation of the blood. He was about thirty years of age and unmarried.—Toronto Globe.

Late inventions. A thunder-rod for people who are liable to be "thunder-struck" on receiving unexpected intelligence; a grindstone for people who are in the habit of "grinding their teeth" when they are in anger; a device for grubbing people who are suddenly "rooted to the spot"; a patent air ship for restoring people to their homes who are "carried away by an excess of emotion"; a "transporter with delight," etc.; a steam-roller for people "petrified with astonishment."—Boston Courier.

The Courier Journal says the sales of tobacco in Louisville will this year foot up between 120,000 and 130,000 hogheads, and Louisville now controls more than half the leaf tobacco produced in the West.
